## About Tradologie.com

Tradologie.com is a next-generation B2B agro-commodity platform that leverages cutting-edge SaaS and AI technology. Our platform facilitates global transactions for a wide range of bulk agricultural commodities, such as rice, wheat, sugar, pulses, spices, edible oil, dry fruits, and various branded food products. We expedite and streamline the entire process from inquiry to payment, ensuring seamless transactions for our users.

## Description

We are seeking a skilled and highly motivated .NET MVC Developer to develop and maintain web applications using Microsoft technologies. The candidate will have expertise in .NET MVC, API, MS SQL Server, and a passion for creating high-quality, scalable, and efficient applications. You will work collaboratively with other developers, testers, and business analysts to design and implement solutions that meet the needs of our clients.

## Responsibilities

### **Key Responsibilities:**

- Develop, test, and maintain web applications using ASP.NET MVC, C#, MS SQL Server, and other related technologies.
- Collaborate with cross-functional teams including business analysts, UI/UX designers, and other developers to gather requirements and implement features.
- Write clean, maintainable, and efficient code, following best practices and coding standards.
- Ensure application performance by optimizing code and database queries for speed and efficiency.
- Participate in code reviews and ensure high code quality and standards are followed.
- Troubleshoot and resolve application bugs and performance issues.
- Work on integrations with external systems via RESTful APIs or other technologies.
- Stay updated with the latest industry trends and best practices to improve development processes and methodologies.

### **Key Skills**

#### **Required Skills & Qualifications:**

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience).
- Proven experience as a .NET MVC Developer or similar role, with 5+ years of experience in web application development.
- Strong proficiency in ASP.NET MVC, JavaScript, and HTML/CSS.
- Experience with MS SQL Server and relational database design.
- Familiarity with Entity Framework, LINQ, and Web API development.
- Proficiency in version control systems such as Git or TFS.
- Knowledge of front-end technologies like jQuery, Bootstrap, or modern JavaScript frameworks (e.g., Angular or React) is a plus.
- Strong problem-solving skills and attention to detail.
- Ability to work both independently and as part of a team in an agile environment.
